### **SERVICE ORGANIZATION(S) MEMBERSHIP:**

Former chair, Anchorage United Way Campaign; board member, Chambers of Commerce: Anchorage, Talkeetna, Commonwealth North.

### **SPECIAL INTERESTS:**

Tutoring and teaching high school math and science.

### **STATEMENT:**

We deserve an effective State Senator who represents the key values of Downtown and Mid-Town District citizens.

As a former Natural Resources Commissioner and ARCO President, I have the proven experience and leadership skills to achieve real solutions.

Alaska's short-term fiscal dilemma needs to be resolved based on our State's long-term commitment to a positive resource development setting that supports economic growth. Once we're on a path toward a revitalized economy, Alaskans will accept the tradeoffs needed to transition to that future.

My career in private industry and my time in State government has given me the experience to get our natural resource industries moving again. Alaska has lost too many high-paying jobs in petroleum, mining, and forestry products. We need a positive pro-development approach to preserve Alaskan jobs and create new opportunities.

As a corporate leader, I have always championed strong family values in the workplace and a strong sense of civic responsibility in meeting the community's social needs. My future actions representing you will build on these same themes.

Education funding remains our State's highest priority expenditure. Providing incentives and rewards to schools for parental involvement is key to educational success.

Government working cooperatively with private health providers is vital to maintaining high quality health care in Alaska.

As your Senator, I will be accessible, responsive, and work constructively on solutions to Alaska's challenges and to address your needs. I ask for your support and I need your VOTE!

I won't just talk about it, I'll do it.
